DETAILED ACTION

Claims 1-10 are pending in this application.

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on May 19, 2004, October 25, 2004 and August 5, 2005 was noted and the submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner has considered the information disclosure statement.

Restriction Requirement

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-4 and 9, drawn to nanoparticles comprising skin care ingredients, classified in class 424, subclass 489.
 - II. Claims 5-8 and 10, drawn to nanoparticles comprising food ingredients, classified in class 426, subclass 289.

The inventions are independent or distinct, each from the other because:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are nanoparticles comprising skin care ingredients and nanoparticles comprising food ingredients.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. Carl Hemenway on September 19, 2006 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-4 and 9. Affirmation of this election must be made by applicant in replying to this Office action. Claims 5-8 and 10 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Wooley et al. (US 6,383,500).

Wooley et al. discloses particles comprising crosslinked shell domain useful for pharmaceutical and other applications. Column 9, line 32 through column 12, line 15 teaches examples of classes of monomers and polymers that can be employed. Column 58, lines 14-19 teach that the particles can have a particle size from about 2 to 1000nm. Column 62, lines 1-6 teach that the particles can be used in cosmetic compositions comprising a cosmetically salt thereof.

Conclusion

4. Claims 1-4 and 9 are rejected.
